

SATHYANANTHAM V

Frontend Architect | Lead Software Engineer | Enterprise UI Platforms & Micro Frontends | AI-Assisted Engineering

Coimbatore, Tamil Nadu, India | +91-8870956756 | v.sathyanantham@gmail.com | linkedin.com/in/sathyanantham-v-646b911b | github.com/sakthipet11 | https://sathyanantham-portfolio-tv.vercel.app/

EXECUTIVE SUMMARY

Frontend Architect and Lead Software Engineer with 13+ years architecting enterprise-scale UI platforms, Micro Frontend ecosystems, and AI-assisted engineering workflows for global retail, commerce, and Order Management clients. Proven record leading 8-engineer teams, driving React.js/TypeScript architecture across 15+ enterprise modules, and pioneering Generative AI adoption — an IBM Call Center AI Chatbot integration built on an MCP (Model Context Protocol) UI application, plus a Claude Skills program that cut common engineering effort by roughly 75%. Deep expertise in agentic AI/MCP UI development, Module Federation, design systems, and full-stack delivery (Node.js, Spring Boot, Python). Known for building reusable engineering platforms that scale developer productivity and business value.

CORE COMPETENCIES

Frontend Architecture & Micro Frontends • Enterprise UI Platforms & Design Systems • Technical Leadership & Mentoring • AI-Assisted / Agentic Engineering • IBM Call Center AI Chatbot & MCP UI Development • Performance Engineering • Solution Architecture • Developer Experience • Enterprise Commerce • Full-Stack Delivery

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python

Frontend & Architecture: React.js, Next.js, Redux Toolkit, React Router, Micro Frontend Architecture, Module Federation, Vite, Webpack, HTML5, CSS3/SCSS

Backend: Node.js, Express.js, Spring Boot, REST APIs, Microservices

Data & Messaging: PostgreSQL, MongoDB, Kafka, Redis

Enterprise Platforms: IBM Call Center AI Chatbot, Order Management Systems (Frontend Integration), AEM, Drupal

AI & Emerging Tech: Claude AI, Claude Skills, MCP (Model Context Protocol) UI Development, OpenAI APIs, IBM watsonx.ai, Prompt Engineering, AI Agents, RAG, LangChain (Learning)

Testing & Quality: Jest, React Testing Library, Vitest, SonarQube

DevOps & Tools: Git, Bitbucket, Jenkins, Docker, Maven, Jira

PROFESSIONAL EXPERIENCE

Lead Software Engineer, Nextuple Inc. (Senior Software Engineer, Aug 2022 – Jul 2023) Aug 2022 – Present

- Architected frontend platform strategy for enterprise Order Management and digital commerce systems, delivering reusable Micro Frontend architecture (Module Federation) across 15+ modules for O'Reilly, Tapestry, DICK'S Sporting Goods, and Ashley Furniture.
- Lead and mentor an 8-engineer team spanning frontend and backend, establishing engineering standards, review practices, and reusable frameworks adopted org-wide.
- Pioneered enterprise Generative AI adoption — led integration of an IBM AI-powered chatbot into enterprise Call Center applications, architecting the MCP (Model Context Protocol) UI application that connects conversational AI agents to enterprise workflows.
- Founded and led the Claude Skills Initiative, engineering reusable AI-assisted development workflows (schema generation, design docs, code/test generation, architecture guidance) that cut common engineering effort from ~20 days to 5 days (~75% reduction) and accelerated new-hire onboarding.
- Designed and built the MCP UI application and schema-driven frontend components powering the IBM Call Center AI Chatbot, enabling agentic tool invocation and dynamic UI rendering; partnered with AI and backend teams on Python-based integration services.
- Delivered core Order Management capabilities across Promise Engine, Inventory, Picking, Packing, Staging, and Hub applications; built reusable React component libraries adopted across teams.

Senior Associate, Cognizant Technology Solutions Nov 2018 – Aug 2022

- Delivered enterprise-grade React.js and Drupal/AEM applications for global Banking, Healthcare, and Life Sciences clients (Bayer, US Bank), owning delivery from architecture through production.
- Built reusable UI component libraries adopted across offshore and onsite teams, improving delivery consistency for global brand websites.
- Conducted code reviews and mentored junior engineers, raising engineering standards and code quality across the team.

Lead Developer → Software Engineer, Skava Systems (Infosys) Jul 2012 – Nov 2018

- Progressed from Software Engineer to Lead Developer over 6+ years, leading frontend architecture and engineering teams for large-scale retail eCommerce platforms serving Adidas, Reebok, Kohl's, Kraft Foods, and Toys"R"Us.
- Directed architecture reviews and mentored engineers, establishing frontend development standards for enterprise commerce applications.
- Built and scaled responsive, high-traffic retail commerce applications using React.js, JavaScript, and Micro Frontend patterns, improving performance and CMS integration.

FEATURED PROJECTS

Claude Skills Initiative

Problem: Repetitive, inconsistent development workflows were slowing delivery across teams. **Solution:** Designed and led adoption of reusable Claude Skills automating schema generation, design docs, code/test generation, and architecture guidance. **Impact:** Cut common engineering effort by ~75% (20 days → 5 days); improved consistency and accelerated onboarding.

IBM Call Center AI Chatbot — MCP UI Application

Problem: Enterprise Call Center teams needed conversational AI agents that could safely interact with, and render, live enterprise UI workflows. **Solution:** Designed and built an MCP (Model Context Protocol) UI application exposing UI components and workflows as tools for the IBM AI Chatbot, with Python-based backend integration services enabling agentic, schema-driven interactions. **Impact:** Enabled AI-assisted, dynamic call center support workflows and established a reusable MCP UI pattern for future agentic integrations.

Enterprise Micro Frontend Platform

Problem: Fragmented, hard-to-scale frontend codebases across business units. **Solution:** Architected a Module Federation-based Micro Frontend platform with reusable component libraries and extensibility frameworks. **Impact:** Standardized architecture across 15+ enterprise modules, increasing code reuse and cutting duplication.

Schema-Driven UI & Extensibility Framework

Problem: Order Management frontend modules required consistent, maintainable UI without heavy custom development per module. **Solution:** Designed a schema-driven UI framework and extensibility patterns adopted across enterprise Order Management frontend modules for clients including Tapestry, DSG, and Ashley Furniture. **Impact:** Reduced implementation effort and improved maintainability across 15+ modules.

CERTIFICATIONS

Introduction to Model Context Protocol (Anthropic) • Building with the Claude API (Anthropic) • Introduction to Agent Skills (Anthropic) • Claude 101 (Anthropic) • Agentic AI (Udemy) • Generative AI Mastermind (Outskill, 2026) • Microfrontends with React: A Complete Developer's Guide (Udemy) • Next.js & React – The Complete Guide (Udemy) • Advanced JavaScript – ECMAScript, ES2017 (Udemy Academy) • React Complete Guide – React Hooks, React Router (Udemy Academy)

AWARDS & RECOGNITION

Top Performer Award 2023 (Nextuple) • Monthly Spot Award (Nextuple) • Best Performer Award 2019 & 2020 (Cognizant) • Skava Star Performer Award 2013 & 2015 • First Place, Phoenix'11 Web Design Competition (2011)

EDUCATION

Master of Computer Applications (MCA) — Dr. Mahalingam College of Engineering and Technology, Pollachi, Tamil Nadu — 2009–2012 (8.28 CGPA)

Bachelor of Science, Computer Science — Nallamuthu Gounder Mahalingam College, Pollachi, Tamil Nadu — 2006–2009 (78.51%)
