

Name – Sathyanantham V

Role / Designation – Lead Software Engineer

Resume updated on – 28/02/2025

Summary

- Accomplished, results-oriented professional with 11+ years of experience in developing the Large scale life science, food service, Ecommerce, Banking & Order Management domain in Cloud Optimized Solutions and Web Application Development.
- Demonstrate passion in analyzing the business and technical requirements and converting into the working solutions.
- Experienced in working with globally distributed teams and successfully lead, designed, developed and delivered highly available, scalable and robust SaaS solutions.

Technical Skills

- **Development Frameworks/Libraries/Tools:** Drupal programming, DX8 and theming, Content Management System, Wordpress, Nginx
- **Programming/Scripting Languages:** TypeScript, JavaScript
- **Web Concepts/Technologies:** Responsive Web Design, HTML5, CSS3, Next JS, React, Redux, JSON, SASS, JQuery, Handlebars, Node JS, FTL, AJAX, Express JS, React Native, Vite, Micro Front End Architecture.
- **Revision Control Systems:** Git
- **Database:** Redis, MongoDB
- **Cloud Platforms:**
 - **Amazon Web Services** - EC2, S3

Certifications

- **Web development from Microsoft Dreamspark Yatra.**
- **Certified in Dot Net Technology in Apollo Computer Education LTD.**

Professional Experience

Nextuple, Lead Software Engineer & AUG 2022 to Current

Lead Software Engineer with expertise in frontend development, microfrontend architecture, and UI extensibility frameworks. Leads a team of frontend developers, driving innovation, performance optimization, and scalable UI solutions across multiple enterprise applications.

- **Leadership & Project Management**
 - Lead a team of frontend developers, overseeing project execution, mentoring, and architectural decisions across multiple initiatives.
 - Collaborated with cross-functional teams, including backend developers, product managers, and UX designers, to align UI development with business goals.
- **Enterprise Product Development**
 - Spearheaded frontend development for Nextuple core products, including:
 - SKU Ranking Service – Developed an interactive SKU ranking system for performance benchmarking.

Name – Sathyanantham V

Role / Designation – Lead Software Engineer

- Packing App – Designed a robust UI for optimizing warehouse packing and shipping workflows.
 - Omni Control Tower – Built a dashboard for real-time inventory tracking and logistics monitoring.
 - Inventory & Promise Engine – Created a dynamic inventory visibility and order promise management system.
 - HUB Modules – Developed a scalable UI for centralized operations management.
- Lead UI Developer for Client Project
 - Dick's Sporting Goods – Lead UI development for a federated microfrontend-based Fulfillment Dashboard, ensuring seamless integration across multiple applications.
 - Designed and implemented:
 - Order & Fulfillment Management UI – Enabled tracking, management, and fulfillment requests via a centralized dashboard.
 - Facility Management UI – Provided store, vendor, and distribution center (DC) management tools.
 - Product Availability UI – Developed an interface for SKU, style, eCode, and hierarchy-level product availability management.
- UI Extensibility & Microfrontend Architecture
 - Designed and developed a UI extensibility framework to enable seamless customization and scalability based on client needs.
 - Implemented a modular architecture using JavaScript, TypeScript, and React, allowing developers to extend core UI components without modifying base code.
 - Created comprehensive documentation to ensure easy adoption of the framework by external developers and internal teams.
- Technology Stack & Implementation
 - Frontend development with React.js, Jest, Node.js, JavaScript, React Native, HTML, CSS, and Micro Frontend architecture.
 - Configured Vite for optimized module federation, lazy loading, and performance enhancements.
 - Ensured scalability, reusability, and maintainability of UI components across different applications.
- Additional Contributions
 - Conducted code reviews, ensuring adherence to best practices and design standards.
 - Worked closely with DevOps teams to streamline CI/CD pipelines for frontend applications.
 - Championed performance optimizations and best practices for frontend frameworks.

Coginzant, Senior Accoicate & Nov 2018 to Aug 2022

Name – Sathyanantham V

Role / Designation – Lead Software Engineer

Experienced UI Lead Developer managing and mentoring a team of five junior and senior frontend developers across multiple projects, ensuring high-quality development, timely delivery, and adherence to best coding practices.

- **Team Leadership & Project Management:**
 - Led a team of five frontend developers, overseeing project execution, mentoring, and task prioritization.
 - Rated and prioritized tasks while balancing team training and upskilling initiatives.
 - Delivered project requirements and coordinated with offshore teams to streamline development processes.
- **React.js Development:**
 - Worked as a React.js UI Developer to develop the Login Help Module for a banking application, enabling users to securely reset and recover their login credentials. Implemented multiple login reset options, ensuring a seamless and user-friendly experience.
 - Implemented unit testing with Jest, ensuring high code quality and maintainability.
 - Followed best practices in React component development and state management.
- **Drupal UI Development:**
 - Developed a content management system (CMS) using Drupal and Acquia DX8, enabling efficient content updates and customization.
 - Ensured seamless integration with backend systems and improved user experience.
- **Requirement Analysis & Technical Documentation:**
 - Performed requirement analysis, collaborated with stakeholders, and created technical design documents with UI-related details.
 - Defined UI architecture, workflows, and best practices for scalable development.
- **Agile & Collaboration:**
 - Participated in daily standups, sprint planning, and tech discussions, actively contributing to decision-making.
 - Conducted product demonstrations, showcasing new features and UI improvements.
- **Code Reviews & Issue Resolution:**
 - Performed code reviews, ensuring adherence to coding standards and design guidelines.
 - Identified and resolved P1 (Priority 1) issues, improving application stability and performance.

Skava Infosys Equinox, Lead Developer & Jan 2012 to Nov 2018

Skava system Introducing Infosys Equinox Studio: Cloud Native, Low-Code Solution Delivering Hyper-Personalized E-Commerce Experiences. Infosys Equinox is a human-centric commerce and marketing platform that supports rich, hyper-personalized experiences across any channel and touchpoint.

Name – Sathyanantham V

Role / Designation – Lead Software Engineer

Experienced Lead Developer specializing in JavaScript, jQuery, Handlebars, FTL, HTML, CSS, Ajax, REST API integration, and CMS development. Successfully lead frontend teams and delivered high-performance, scalable UI solutions for enterprise applications.

- **Frontend Development & Large-Scale Module Implementation:**
 - Spearheaded the development and optimization of critical modules, including:
 - Home, Category, Product List, Product, Offers, Shopping Bag, Omni-Channel Bag, Find in Store, Pick Up in Store, List, Registry, Loyalty, Checkout, and My Account.
 - Designed and integrated REST APIs for seamless data communication, enhancing user experience and performance.
 - Developed responsive, cross-browser-compatible UI components, ensuring consistency across platforms.
- **Leadership & Team Management**
 - Supervised a team of six developers, providing mentorship and guidance on best practices.
 - Successfully led the team through Visa Checkout integration on mobile and tablet sites, ensuring a smooth and secure payment experience.
 - Conducted team training sessions to improve technical skills and workflow efficiency.
- **Feature Implementation & Optimization**
 - Installed and configured:
 - Checkout, My Account, Buy Online Pick Up in Store (BOPUS), Omniture, Google Analytics (GA) for Product Pages and Product Lists, List & Registry Modules, Foresee, and Product Recommendation features.
 - Executed V5 Standardization Implementation, enhancing UI consistency and maintainability.
- **Technical Design & Agile Collaboration**
 - Performed requirement analysis, creating technical design documents with UI-related specifications.
 - Delivered project requirements to the offshore team, ensuring smooth collaboration and alignment.
 - Rated and prioritized tasks to maintain development velocity while balancing team training.
 - Actively participated in standup meetings and technical discussions, demonstrating new product features and improvements.
- **Code Quality & Performance Optimization**
 - Conducted code reviews, enforcing best practices and coding standards.
 - Resolved P1 (Priority 1) issues, ensuring application stability and a seamless user experience.
 - Optimized frontend performance, reducing load times and improving interactivity.
- **Key Technologies & Tools:**
 - JavaScript, jQuery, Handlebars, FTL, HTML, CSS, Ajax, REST API, CMS, Omniture, Google Analytics, BOPUS, Foresee, Product Recommendations
