Technical Skills

</> Frontend Architecture

Expert

React.js, TypeScript, JavaScript (ES6+),
Next.js, HTML5, CSS3, SCSS, Redux
Toolkit, React Router, Vite, Webpack,
Micro Frontend Architecture,
Module Federation, UI Extensibility
Framework, Design Systems,
Responsive Web Applications,
Performance Optimization

Backend (Working Experience)

Advanced

Node.js, Express.js, Spring Boot,
Python, REST APIs, Microservices,
PostgreSQL, MongoDB, Kafka, Redis

🏢 Enterprise Platforms

Advanced

IBM Sterling OMS (Learning &
Production Contribution), IBM Call
Center, Order Management Systems,
Digital Commerce, Retail Solutions

🧠 AI & Emerging Technologies

Advanced

Generative AI (Applied in Production),
Python (Applied for AI Integration),
Claude AI, Claude Skills, OpenAI
APIs, IBM AI Models, IBM watsonx.ai
(Learning), Prompt Engineering, AI
Agents, MCP (Model Context Protocol),
LangChain (Learning), RAG Concepts

DevOps & Tools

Professional Summary

Lead Software Engineer with 13+ years of experience designing, architecting, and delivering enterprise-scale frontend applications, digital commerce platforms, and Order Management solutions. Specialized in React.js, TypeScript, Enterprise UI Platforms, Micro Frontend Architecture, and scalable frontend ecosystems with extensive experience leading engineering teams, mentoring developers, and driving technical architecture for global enterprise clients.

Currently leading a team of 8 engineers, providing technical leadership through architecture reviews, design discussions, code reviews, engineering standards, and mentoring frontend and backend developers.

Recently expanded into Generative AI by contributing to the integration of an IBM AI-powered Chatbot for enterprise Call Center and Order Management applications, supporting IBM Sterling OMS customizations, developing Python-based AI integration services, and building reusable Claude Skills that significantly improve engineering productivity across frontend and backend teams.

In addition to frontend architecture, contribute to backend development using Node.js and Spring Boot, supporting enterprise integrations and business services while continuing to strengthen expertise in these technologies. Passionate about building reusable engineering platforms, scalable frontend architectures, developer productivity tools, and enterprise software that delivers measurable business value.

Professional Experience

Nextuple Inc.

August 2023 – Present

Lead Software Engineer

Expert
Git, Bitbucket, Jenkins, Docker, Maven,
Jira, SonarQube, VS Code, Eclipse

☆ Key Highlights

Expert
13+ Years of Software Engineering
Experience, Frontend Architecture
Specialist, Lead Software Engineer,
Team Lead (8 Engineers), Technical
Mentor, React.js Expert, TypeScript
Specialist, Enterprise UI Platforms,
Micro Frontend Architecture, Module
Federation, IBM Call Center
Integration, IBM Sterling OMS
(Production Experience & Learning),
Generative AI Practitioner, Python for
AI Integration, Claude Skills Creator,

Enterprise Order Management
Solutions, Performance Optimization,
Solution Design, Technical Leadership

🔗 Technical Leadership

Expert
Lead a team of 8 engineers across
frontend and backend development,
Mentor engineers through technical
guidance, architecture discussions,
and code reviews, Define engineering
standards and reusable development
patterns, Drive frontend architecture
decisions for enterprise applications,
Collaborate with architects, product
owners, UX designers, QA teams,
and client stakeholders, Conduct
architecture reviews and technical
design sessions, Promote engineering
best practices and knowledge sharing,
Guide team members in adopting
modern frontend technologies and
AI-assisted development workflows

⚡ Professional Strengths

Productivity, AI-assisted Development,

Technical Leadership:

- Lead frontend architecture for enterprise Order Management and commerce applications
- Mentor a team of 8 engineers across frontend and backend development
- Establish engineering standards, reusable frameworks, and development best practices Drive architecture reviews, code reviews, and solution design discussions
- Collaborate with product managers, architects, UX teams, QA engineers, and client stakeholders Frontend Architecture
- Design and develop scalable enterprise applications using React.js and Micro Frontend Architecture
- Build reusable UI component libraries and extensibility frameworks
 - Improve application performance using lazy loading, code splitting, and optimized rendering techniques
- Deliver reusable architecture across 15+ enterprise modules and applications
- Develop schema-driven UI solutions that improve maintainability and reduce implementation effort IBM AI & Innovation
- Lead integration of IBM AI-powered chatbot into enterprise Call Center and Order Management applications
- Contribute to IBM Sterling OMS customizations and frontend integrations for enterprise clients
- Develop Python-based utilities supporting AI-enabled workflows
- Contribute to backend integration services using Node.js and Spring Boot
- Collaborate with AI and backend teams to deliver enterprise AI solutions Claude Skills Initiative
- Designed and implemented reusable Claude Skills for frontend and backend engineering teams

Automated and standardized:

- UI Schema Generation, Technical Design Documentation, Code Generation, Unit Test Generation, Architecture Guidance, Development Standards, API Documentation, Frontend Development Patterns Business Impact
- Reduced engineering effort for common development activities from ~20 days to 5 days
- Improved engineering consistency and reduced repetitive development work
-

Accelerated onboarding of developers and increased code reuse across multiple teams
Performance Improvements

- Optimized React application performance through lazy loading and code splitting
- Improved UI rendering performance and maintainability through reusable frontend architecture
- Increased code reuse across multiple projects using Micro Frontend

Architecture Enterprise Clients:

- O'Reilly, Tapestry (IBM Sterling OMS), DICK'S Sporting Goods (DSG), Ashley Furniture

Technologies:

- React.js, TypeScript, JavaScript, Node.js, Spring Boot, Python, IBM Sterling OMS, IBM AI, REST APIs, Kafka, Redis, PostgreSQL, Micro Frontend Architecture, Vite, Module Federation

Nextuple Inc. August 2022 – July 2023
Senior Software Engineer

Technical Leadership:

- Developed enterprise Order Management applications
 - Contributed to Promise Engine, Inventory, Picking, Packing, Staging, and Hub applications
 - Built reusable React components and frontend frameworks
 - Worked closely with architects and product owners
- Technologies:
React.js, TypeScript, JavaScript, Node.js, Spring Boot, REST APIs, Kafka, Redis, PostgreSQL

Cognizant Technology Solutions November 2018 – August 2022
Senior Associate

Key Responsibilities

- Developed enterprise applications using React.js and Drupal for global clients in Banking, Healthcare, and Life Sciences
 - Delivered responsive websites for global brands
 - Built reusable UI components
 - Worked closely with offshore and onsite teams
 - Conducted code reviews and mentored junior developers
- Major Clients:
Bayer, US Bank Technologies: React.js, Drupal, AEM, JavaScript, HTML5, CSS3, SCSS, Node.js

Skava Systems (Infosys) February 2016 – November 2018
Lead Developer

Key Responsibilities

- Led frontend development for large-scale retail eCommerce platforms
- Mentored engineers and conducted architecture reviews
- Delivered enterprise commerce applications and implemented responsive web applications Major Clients: Adidas, Reebok, Kohl's, Kraft Foods Technologies: React.js, JavaScript, HTML5, CSS3, Node.js, Micro Frontend Architecture

Skava Systems (Infosys)

February 2014 – January 2016

Senior Software Engineer

Key Responsibilities

- Worked on enterprise commerce applications for Kohl's and Toys"R"Us
- Developed using JavaScript, React.js, HTML5, CSS3, and Node.js

Skava Systems (Infosys)

July 2012 – January 2014

Software Engineer

Key Responsibilities

- Worked on retail commerce platforms implementing frontend features, performance improvements, and CMS integrations

Key Projects & Initiatives

Claude Skills Initiative

Designed and implemented reusable Claude Skills for frontend and backend engineering teams, automating UI Schema Generation, Technical Design Documentation, Code Generation, Unit Test Generation, Architecture Guidance, Development Standards, API Documentation, and Frontend Development Patterns.

Reduced engineering effort from ~20 days to 5 days for common development activities.

IBM AI-Powered Chatbot Integration

Led integration of IBM AI-powered chatbot into enterprise Call Center and Order Management applications.

Developed Python-based AI integration services and collaborated with AI/Backend teams to deliver enterprise AI solutions.

Enterprise Micro Frontend Architecture

Architected and delivered scalable Micro Frontend Architecture using Module Federation across 15+ enterprise modules and applications.

Built reusable UI component libraries, extensibility frameworks, and schema-driven UI solutions.

IBM Sterling OMS Customizations

Contributed to IBM Sterling OMS customizations and frontend integrations for enterprise clients including Tapestry, DSG, and Ashley Furniture.

Education

Dr. Mahalingam College of Engineering and Technology

Master of Computer Applications (MCA) • 8.28%

Pollachi, Tamil Nadu, India • July 2009 – June 2012

Nallamuthu Gounder Mahalingam College

Bachelor of Science (Computer Science) • 78.51%

Pollachi, Tamil Nadu, India • July 2006 – May 2009

Certifications

Introduction to Agent Skills

Claude Certificate

React Testing Library with Jest / Vitest

Principles of Secure Coding

Docker for the Absolute Beginner

Azure Serverless – Hands-on Learning

Generative AI

Awards & Recognition

Top Performer Award

2023

Nextuple

Monthly Spot Award

Nextuple

Best Performer Award

2019, 2020
